Fugitive Dust Control Report & Effectiveness Assessment

for compliance with

40CFR257: Disposal of Coal Combustion Residuals from Electric Utilities

CCR UNITS:

(located at Jefferies Generating Station)

Ash Pond A

Sign Dennis B. McMakin Date 1/5/2026

Print Name/Title: Brett McMakin, Operations Supervisor, Jefferies Generating Station

01/05/2026

I. EFFECTIVENESS ASSESSMENT

The CCR Fugitive Dust Control Plan was reviewed by evaluating all documented sources and control measures.

II. FUGITIVE DUST CONTROL MEASURES

Fugitive dust control measures were put into place based on routine visual inspections of all CCR Units by plant personnel. When excess fugitive dust was observed, plant personnel took action to minimize dust by executing control measures as described in Table 1 below:

Table 1: List of CCR Units

CCR Unit	Description	Control Measures
Ash Pond A	Excavating, Screening, Wind Erosion, Haul Roads	- Process equipment and stockpile watering - Water truck on haul roads

III. CITIZEN COMPLAINTS

There are no citizen complaints to report in 2025.

IV. CORRECTIVE ACTIONS

Standard fugitive dust control measures were sufficient. Therefore, no additional corrective actions were needed.
