Santee Cooper – Winyah Generating Station Ash Ponds A & B
Notice of Completion of Closure by Removal of CCR

Santee Cooper is providing notification of completion of closure by removal of CCR for the Winyah Generating Station Ash Ponds A & B in accordance with the United States Environmental Protection Agency (U.S. EPA) Federal Coal Combustion Residuals (CCR) Rule (40 CFR Part 257).

In accordance with §257.102(f)(3) the owner or operator of the CCR unit must obtain certification from a qualified professional engineer verifying that closure has been completed in accordance with the closure plan specified in §257.102(b) and the requirements of §257.102. §257.102(c) states that closure by removal of CCR is complete when:

1. CCR has been removed;
2. Any areas affected by releases from the CCR unit have been removed or decontaminated; and
3. Groundwater monitoring concentrations of the constituents listed in Appendix IV to 40 CFR Part 257 do not exceed groundwater protection standards established pursuant to §257.95(h).

Santee Cooper has completed CCR and underlying soil removal for the above-referenced CCR unit in accordance with the closure plan specified in §257.102(b) and the state-approved closure plan in accordance with §257.102(b)(3). This certification only applies to Items 1 and 2 above with the removal and decontamination of the CCR unit and any affected areas. Ash Ponds A & B are currently in corrective action, with groundwater monitoring on a semiannual schedule for Appendix IV constituents. Upon completion of the groundwater corrective action remedy, Santee Cooper will obtain a separate and severable certification from a qualified professional engineer attesting that Item 3 above has been achieved. The groundwater monitoring data and statistical evaluations have been (and will continue to be) documented in the Annual Groundwater Monitoring and Corrective Action Reports published on Santee Cooper's public website.

CERTIFICATION

I, the undersigned Professional Engineer registered in good standing in the State of South Carolina, do hereby certify to the best of my knowledge, information, and belief, that the information contained herein is true and correct and has been prepared in accordance with generally accepted good engineering practices.
