

THE POWER IS YOURS

For Earth Day, you
could purchase your
share of the sun.

HOW SOLAR SHARE WORKS

1.

PARTICIPANTS

Pay for a share(s)
of the solar farm

2.

SOLAR PANELS

Solar power is
distributed to the grid
that powers your
home/business

3.

SANTEE COOPER

Santee Cooper credits
participants for their share
of generated electricity

Starting at just \$6 per month, you can get your share of the sun by purchasing a subscription of Solar Share, our community solar program that uses energy generated by the Colleton Solar Farm.

Solar Share is simple solar ideal for businesses that:

- Rent.
- Don't get enough sun on their roof or their business isn't situated in a way that rooftop solar would be cost-effective.
- Have a roof that cannot support a rooftop solar installation.
- Don't want the maintenance and upkeep of rooftop solar.

To learn more about your Solar Share options, scan this QR code or visit www.santecooper.com/SolarShare, email solar@santecooper.com or call 800-804-7424.

Fees and energy credits will be based on the most recent Distributed Generation (DG) Rider.
