

Santee Cooper Green Power

helps preserve the environment,
reduces demand on our non-
renewable natural resources, and
increases our energy independence.

2023 HISTORICAL PRODUCT CONTENT LABEL		
The product is sold in blocks of 100 kilowatt hours (kWh). The product was made up of the following renewable resources:		
Green-e Energy Certified New ² Renewables in Green Power	Generation Location	
	2023 ¹	
Biomass	47%	South Carolina
Solar	53%	South Carolina
Total	100%	

¹The 2023 figures reflect the power resources generated and supplied for the year ending December 31, 2023. Change in product mix occurred to diversify our renewable portfolio that historically consisted of a large portion of Landfill Gas generation.

²New Renewables come from generation facilities that first began commercial operation within the past 15 years. This product includes generation from a facility that is approved for extended use by Green-e Energy.

For comparison, the current average mix of resources supplying Santee Cooper includes: Coal 41%, Nuclear 9%, Oil 0%, Natural Gas 20%, Hydro 2%, and other 27%.
(Source: Annual Santee Cooper actual generation data.)

The average home in South Carolina uses 1,088 kWh per month.
