

POWERING A GREENER COMMUNITY

Santee Cooper is proud to partner with our community through our Green Power Program.

Coastal Carolina University has joined the effort with a "Green Season," powering their home football games with Green Power this season.

The Loris Bog-Off Festival on Sat., Oct. 18, will also be a Green Power Event.

Want to make your next event, festival, or season a Green Power Event? Get started by scanning this code.

Community Roots, Future Growth

We proudly donated 800 acres that was once the Grainger Generation Station site to the City of Conway, preserving its legacy and creating new opportunities for community development. The City of Conway announced plans for the land to be transformed into a public park. Their plans include an inland beach, which will allow kayaking and swimming without boat traffic, an expanded Riverwalk, and an entertainment area.

Check out this video announcing the donation of the property and the plans the City of Conway has for development.
