Winter Peak Demand is Coming: New Times Begin in November

DEFEAT THE PEAK.

Winter:

5 - 9 AM

November – March

Scan for more
information!

Get ready to transition to morning Peak Hours – 5 a.m. to 9 a.m. during winter months (November through March). Shift or delay using your energy-guzzling appliances during this time. One of your biggest energy users is your heating and cooling system. Try to manage this system's usage and settings in a way pre-heat your home before peak hours, by using smart thermostats. Turn the temp up slowly — not all at once. Keep filters clean and drafts sealed.
