

On-Peak Hours Change in November

Mark your calendars!

Beginning Nov. 1, on-peak hours move to mornings – from 5 a.m. to 9 a.m. Manage your electric use and demand with smart energy habits.

Smarter Controls: Use smart thermostats, automatic lighting controls and water heater timers to schedule your electric use and reduce demand.

Smarter Lighting: Install energy-efficient lighting and replace old bulbs with LEDs.

Efficiency Pays: Make sure you have proper insulation and regular maintenance on your heating and cooling system.
