

## Give Your Heat Pump a Little Summer Love

Whether at home or at your business, hot summer days take a toll on your heat pump. Give your heat pump some extra love this summer by regularly replacing filters and scheduling a tuneup, which can prolong the life of the equipment and keep it working efficiently.

If you need to replace your heat pump, we offer rebates for qualifying equipment.

## Dark Beaches Save Turtles

It's turtle nesting season! Baby sea turtles use moonlight to guide them to the ocean, and they need a clear path to make it to the sea. Keep beaches safe at night for sea turtles by:

- Turning off beachfront lights.
- Filling in holes in the sand.
- Leveling out sand from sandcastles.
- Removing chairs, toys and other beach equipment.

Help Santee Cooper spread the word about sea turtle conservation with a **FREE** "Lights Out! Sea Turtles Dig the Dark" sticker.
