2025 HISTORICAL PRODUCT CONTENT LABEL

The product is sold in blocks of 100 kilowatt hours (kWh).

The product was made up of the following renewable resources:

Green-e Energy Certified New² Renewables in Green Power

Generation Location

	2025 ¹	
Biomass	0%	
Geothermal	0%	
Solar	100%	South Carolina
TOTAL	100%	

¹ The 2025 figures reflect the power resources generated and supplied for the year ending December 31, 2025. Change in product mix occurred to diversify our renewable portfolio that historically consisted of a large portion of Landfill Gas generation.

² New Renewables come from generation facilities that first began commercial operation within the past 15 years. This product includes generation from a facility that is approved for extended use by Green-e Energy.

For comparison, the current average mix of resources supplying Santee Cooper includes: Coal 41%, Nuclear 9%, Natural Gas and Oil 20%, Hydro 2%, and Other 27%. (Source: 2025 Santee Cooper actual generation data)

The average home in South Carolina uses 1,050 kWh per month. (Source: Energy Information Administration 2024)

For specific information about this electricity product, contact Santee Cooper at (843) 761-8000, e-mail GreenPower@santeecooper.com, or visit www.santeecooper.com/greenpower.

Energy
CERTIFIED
