

Give Your Home a Breath of Fresh Air

Leaks, gaps and poor airflow from old or poorly installed ductwork can make your heat pump work overtime. Upgrading ductwork is a simple way to boost energy performance and comfort in every room.

We offer a \$500 rebate for qualifying duct replacement for single-family and multifamily homes.

Your 3-Step Path to Comfort:

- 1. Partner Up with a Trade Ally:** Find a trusted, participating contractor on our website.
- 2. Upgrade:** Complete duct replacement project, including the required pre- and post-installation duct leakage testing.
- 3. Save:** Submit your rebate application.
