**iNote subject: COVID-19 Vaccine Update**

As COVID-19 vaccines are beginning to be distributed across the state, we are working on a plan to vaccinate employees.

[The CDC says the vaccine is safe](#). COVID-19 vaccines were tested in large clinical trials to see how the vaccines offer protection to people of different ages, races, and ethnicities, as well as those with different medical conditions. CDC has an independent group of experts that reviews all the safety data as it comes in and provides regular safety updates. It recommends most adults get the vaccine.

In the next couple of weeks, we will be sending out a registration form for the vaccine. If you want to receive the vaccine, please fill out the form so we can request enough doses.

You can visit our [COVID-19](#) page for more information on the vaccine, including vaccine information sheets on the two that are now available.
