

DATE: 06/7/2022

SUBJECT: Horry County COVID-19 Cases at High Level

The number of COVID-19 cases are increasing across South Carolina, and according to the [CDC Data Tracker](#), Horry County's COVID-19 Community Level is currently "high," based on the case rate per 100,000 population and the hospital admission rate. We will monitor the situation, and we will communicate any changes regarding facial coverings or other requirements if or when they occur. As has been the case, employees who want to wear a facial covering at work are encouraged to do so.

Please refer to the [iNote](#) sent on May 20, 2022, for a reminder of Santee Cooper's COVID-19 procedures, and visit our [Coronavirus Disease 2019](#) iPort page or our external employee page at www.santecooper.com/COVID19 for additional information.
