

Journeyman Event – HURTMAN RESCUE

Event Time: 3 Minutes
Drop Dead Time: 5 Minutes

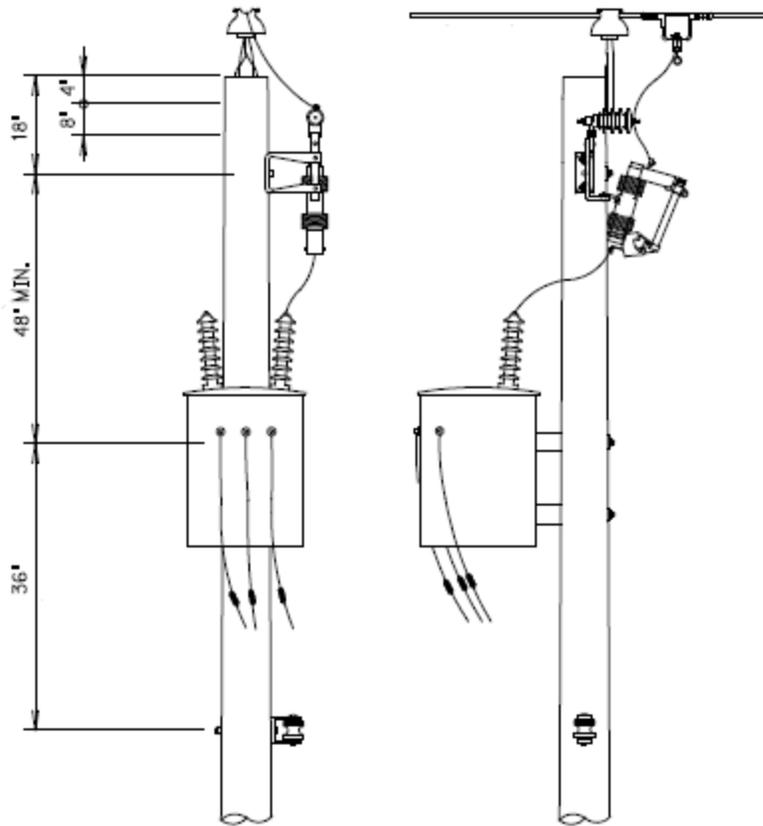

This team event will be run one time with all three team members participating to rescue the hurtman. One must climb, one must open switch, and one must tag the mannequin. Teams have 5 minutes to set up and ask questions. The cutout must be opened before the climber can install the fall arrest device and ascend the pole. The cutout will be opened from the ground using an extendo stick and rubber gloves. The stick must be off the ground and the body anytime it is touching anything energized. The climber will put on climbing gear after the event time begins. The climber will split handline and loop bottom part of handline around mannequin's legs, then take the top part and wrap around the pole a minimum of one and a half wraps, run the rope under mannequin's arms, and tie with three half hitches. The mannequin will then be lowered to the ground while the third member of the team uses the bottom part of handline tied to the mannequin's legs to keep it off the pole and pull it on to the tarp. The mannequin must land gently with all of its body on the tarp that will be provided and placed 5' from pole centered under switch.

1. Time starts at judge's signal with all team members at least an arm's length from pole, the extendo stick must be fully retracted lying flat on the tarp.
2. Rubber Gloves will be in glove bag cuffs down and bag snapped.
3. The stick finger must be in the switch eye when opening/closing the cutout.
4. Climber must wear rubber gloves ground to ground.
5. Any standard knot or hitch can be used when tagging the mannequin's legs.
6. The blade of the climber's knife must not be exposed while climbing.
7. A Buckingham Buck Squeeze Rescue Belt 483M will be used on the mannequin and the climber will cut the orange 483A insert. There will be a 10-point deduction for cutting the belt in the wrong place.
8. Judges will use a 3" PVC conduit between the rope and the mannequin to evaluate the rope knot, the eye splice cannot be in any part of the knot.
9. Time will stop when mannequin is on the tarp with **slack** in the hand line and the extendo stick is **fully** retracted and back on the tarp.
10. Climber will stay on pole and help hang mannequin for the next team.
11. Scoring will continue until the event site is returned to its original condition.
12. All general rules apply.
