

## **Apprentice Written Test Greeting & Instructions**

This event is a written test compiled of 24 questions, multiple choice and true/false safety knowledge questions. These questions have been selected from both the APPA Safety Manual and the Electric Cooperatives of South Carolina safety manual, and are common to both.

Each participant will begin with 100 points. For each incorrect answer, 1 point will be deducted. In the event of a tie, time will be used as a tie-breaker. The test has a 15 minute time limit.

- All apprentices will take the test simultaneously.
- Before you, facing down is the test. Do not flip it over until instructed to do so. Facing up, you should see a blank score sheet. Please put your apprentice #, name, and utility on the answer sheet.
- All answers shall be written on the score sheet.
- Completely darken the circle for the correct answer. Any answer marked with an X will be considered incorrect. Only darken answers will be answered.
- More than one answer darkened will be considered as an incorrect answer.
- Any unanswered questions will be considered as incorrect.
- A judge has a stop watch timing you. You should hand your test to your respective judge and tell them you are done. They will stop the watch, tell you the time, and the judge will write your time on your answer sheet. You are responsible to ensure that they write your time on your score sheet.
- Written test scores will be made available with a completed event rotation card.
